

CYNGOR BWRDEISTREF SIROL RHONDDA CYNON TAF COUNTY BOROUGH COUNCIL

COMMITTEE SUMMONS

C Hanagan
Service Director of Democratic Services & Communication
Rhondda Cynon Taf County Borough Council
The Pavilions
Cambrian Park
Clydach Vale, CF40 2XX

Meeting Contact: Hannah Williams - Council Business Unit (01443 424062)

YOU ARE SUMMONED to a meeting of CLIMATE CHANGE CABINET STEERING GROUP to be held at the Committee Room 1, The Pavilions, Cambrian Park, Clydach Vale, Tonypandy, CF40 2XX on MONDAY, 18TH NOVEMBER, 2019 at 2.30 PM.

Non Committee Members and Members of the public may request the facility to address the Committee at their meetings on the business listed although facilitation of this request is at the discretion of the Chair. It is kindly asked that such notification is made to Democratic Services by Thursday, 14 November 2019 on the contact details listed above, including stipulating whether the address will be in Welsh or English.

AGENDA Page No's

1. DECLARATION OF INTEREST

To receive disclosures of personal interest from Members in accordance with the Code of Conduct.

Note:

- 1. Members are requested to identify the item number and subject matter that their interest relates to and signify the nature of the personal interest.
- 2. Where Members withdraw from a meeting as a consequence of the disclosure of a prejudicial interest they <u>must</u> notify the Chairman when they leave.

2. TERMS OF REFERENCE

To approve the Terms of Reference of the Steering Group.

3. FUTURE WORK PROGRAMME

To receive the report of the Chief Executive, which outlines the Council's current position in respect of climate change and the proposed future work programme.

9 - 22

4. BIODIVERSITY DUTY

To receive a presentation in conjunction with the report of the Director, Public Health, Protection and Community Services, which seeks to update Members on the progress in discharging the Council's Biodiversity Duty and to seek approval to submit the required update report to Welsh Government.

23 - 52

5. CORPORATE ESTATES ENERGY AND CARBON REDUCTION UPDATE

To receive the report of the Director, Corporate Estates, providing Members with an update on Corporate Estates energy and carbon reduction.

53 - 56

6. COMMUNITY USE OF UNDERUSED/VACANT RCT LAND

To receive the report of the Director, Corporate Estates, providing Members with a draft streamlined procedure for the community use of underused/vacant RCT land.

57 - 64

7. URGENT BUSINESS

To consider any items, which the Chairman, by reason of special circumstances, is of the opinion should be considered at the meeting as a matter of urgency.

Service Director of Democratic Services & Communication

Circulation:-

The Chair and Vice-Chair:

(County Borough and County Borough respectively)

County Borough Councillors:

Councillor R Lewis, Councillor M Webber, Councillor M Norris, Councillor A Crimmings, Councillor S Belzak and Councillor E Webster

Officers:

Chris Bradshaw, Chief Executive

Christian Hanagan, Service Director of Democratic Services & Communication Nigel Wheeler, Group Director – Prosperity, Development & Frontline Services Paul Mee, Director, Public Health, Protection & Community Services Barrie Davies, Director of Finance & Digital Services David Powell, Director of Corporate Estates Lesley Lawson, Performance Manager

External Representation:

Friends of the Earth Welcome to our Woods

Climate Change - Cabinet Steering Group

Terms of Reference.

Responding to Climate Change - Cabinet Steering Group

Membership: (6 representatives)

Names of Members: County Borough Councillors:

R Lewis (Chair), M Webber (Vice Chair), A Crimmings, M Norris, E Webster, S Belzak

Terms of Reference:

- To support the implementation and delivery of the priorities identified within the Council's Corporate Plan, this Cabinet Steering Group will:
- Advise the Cabinet on the development of specific actions and policies which support the reduction of the Council's Carbon Footprint and respond to 'Net Zero'

 The report of the Committee On Climate Change and the Welsh Government's report Prosperity for All: A Low Carbon Wales;
- Advise the Cabinet on how the Council can deliver upon its commitment to match the ambitions of the UK 100 Agreement by becoming a Clean Energy organisation;
- Provide a forum for the Council to develop these commitments and in doing so, become more ambitious through resetting targets and challenging how the Council operates and approaches challenges in the future to become a Carbon Neutral Council by 2030.
- Provide the opportunity for persons, interested parties, and groups who in live in Rhondda Cynon Taf County Borough Council the ability to engage in the wider response of the community to climate change;
- Consider the long term trends that will affect Rhondda Cynon Taf and what steps can be taken locally to contribute to their mitigation;
- Consider how the Council can work with others both locally and nationally to consider joint solutions
- To monitor the implementation of the Scrutiny recommendations in respect of Low Carbon Vehicles and any such future recommendations in respect of climate change.

Purpose of the Steering Group:

The Cabinet Steering Group has been established to ensure an Authority-wide approach to issues of climate change and the Council becoming a carbon neutral organisation by 2030. Its membership will provide strategic direction and will initially consider any local policies regarding climate change and associated matters. Its membership will consider how the Council can support changes in residents' behaviour, to deliver the necessary actions to respond proactively to climate change and in doing so, support business, communities and residents to reduce their own environmental impact.

This Cabinet Steering Group will provide the opportunity to proactively discuss progress and delivery of actions, which emanate from the Corporate Plan, which aims to meet climate change challenges and reduce the Council's carbon footprint.

Membership:

The Cabinet Steering Group membership includes Cabinet Member representation (as shown above) including additional County Borough Councillors from cross party groups as determined by the Leader. These Members will all hold equal voting rights.

Senior Leadership Team Representation (Chief Executive, Group Director - Prosperity, Development & Frontline Services; Director Public Health, Protection & Community Services; and the Service Director of Democratic Services & Communications), service officer representation — Council's Performance Manager where appropriate and external representation when required.

Officers and External representatives will provide strategic direction and will consider any local policies regarding climate change and associated matters and any other business as appropriate, however voting rights are conveyed to the cabinet Members and County Borough Councillors determined by the Leader only.

The Cabinet Member for Stronger Communities, Well-being & Cultural Services will Chair the Cabinet Steering Group and will also be the Climate Change/Net Zero Champion. The Chief Executive will be the Officer Champion.

Both Champion roles will raise the profile of any relevant legislation and policies at Cabinet and Senior Leadership Team level as well as supporting and developing the response of the Council. The roles are integral to the future development of polices in this area and each champion will be tasked with championing these matters at all levels of decision making within the Council.

External representation:

Local interest groups will be invited to attend the Cabinet Steering Group in order to ensure that residents and communities are fully and directly involved in shaping its work.

This will enable both groups and individuals to contribute and influence to the development of policies for consideration by the Council, although no voting rights will be attributed to such external positions.

The Cabinet Steering Group will also provide the opportunity for its members to hear from services and discuss issues that affect service delivery relating to climate change, both at

a community and strategic level. The Cabinet Steering Group will have the ability to work in partnership with communities to provide improved outcomes for residents.

Frequency: Meetings will be held every six months unless otherwise agreed by the Cabinet Steering Group. Urgent meetings of the group can be convened if felt appropriate by the Chair.

RHONDDA CYNON TAF COUNTY BOROUGH COUNCIL CLIMATE CHANGE CABINET STEERING GROUP

18TH NOVEMBER 2019

DISCUSSION PAPER - WORK PROGRAMME FOR THE CLIMATE CHANGE CABINET STEERING GROUP

REPORT OF THE CHIEF EXECUTIVE IN DISCUSSION WITH THE CABINET'S CLIMATE CHANGE CHAMPION (COUNCILLOR RHYS LEWIS)

AUTHOR: Chris Bradshaw: 01443 424026

1. PURPOSE OF THE REPORT

1.1 The purpose of the report is to set out a potential work programme for the Members of the Climate Change Cabinet Steering Group to consider in order that action can be proposed to Cabinet to response to the Cabinet's commitment for the Council to be Carbon Neutral by 2030, and to work with residents and businesses within the Borough to ensure the whole County Borough is Carbon Neutral as close as possible to the 2030 target.

2. **RECOMMENDATIONS**

It is recommended that the Steering Group:

- 2.1 Note the contents of this report;
- 2.2 Discuss and consider the draft four month work programme to 31 March 2020. This will enable the Steering Group to present to Cabinet early in the new financial year, a series of recommendations to further reduce the Council's carbon emissions and make good progress towards achieving the 2030 Carbon Neutral target;
- 2.3 Consider whether other public, private or community organisations should be invited to contribute to advising and supporting the Steering Group on specific items within the Work Programme.

3 REASONS FOR RECOMMENDATIONS

3.1 For the Council to respond to strive to become Carbon Neutral by 2030.

4. BACKGROUND

- 4.1 In March 2018, Rhondda Cynon Taf Council signed up to the UK100 Clean Energy Commitment to take appropriate action in order to transition towards being a fully environmentally responsible Authority by 2050. In doing so, the Council acknowledged:
 - The historic commitments made at the 2015 United Nations Climate Change Conference in Paris towards the future of renewable energy;
 - Our responsibility to help secure an environmentally sustainable future for our residents and in relation to the global effects of manmade climate change;
 - That air pollution increases the risk of lung cancer, it can worsen existing lung conditions and stunt the growth of children's lungs;
 - That climate action is not an inhibitor of economic growth but rather
 a driver of it, and additional benefits of the development of green
 industries include the potential to capitalise on the objectives of the
 Cardiff Capital Region City Deal, in creating well-paid, high-skilled
 employment locally, regionally and nationally; better health and
 wellbeing and financial savings to residents and businesses in the
 short and longer term.
- 4.2 In light of this, the Council resolved to:
 - Match the ambitions of the UK100 Agreement through pledging to achieve 100% clean energy across Rhondda Cynon Taf Council's full range of functions by 2050;
 - Work in partnership with our residents and business community to deliver against the commitments made nationally and internationally at the 2015 Paris Summit;
 - Turn these commitments into reality through developing a `route map` to a sustainable future, working together with local business, educational and residential communities as part of an integrated approach to a shared sustainable future.
- 4.3 Over the past year there has been significant worldwide escalation in the environmental pressure placed on political leadership across international, national, regional and local government to provide strong leadership to accelerate the international commitments set out in the Paris Agreement of 2015. The aim of the Paris Agreement is to strengthen the global response to the threat of climate change by keeping a global temperature rise this century well below 2 degrees Celsius above pre-industrial levels and to pursue efforts to limit the temperature increase even further to 1.5 degrees Celsius. However, many environmental experts consider that the world is on the cusp of a significant detrimental environmental change caused by climate change, and that the timescales for the targets set out in the Paris Agreement need to be reduced to 2040 or even 2030.

- 4.4 There is a growing demand for governments at all levels to accept that climate change is an emergency and radical action needs to be taken by us all, individually and collectively, to reduce our carbon footprint and to reduce the impact of greenhouse gasses on our environment. The Climate Emergency Group that has sought to commit government at all levels to declare a "climate emergency" is seeking the UK to have zero carbon emissions by 2030.
- 4.5 Zero-carbon is defined as "no carbon is produced from a process such as heating a building", whereas Carbon Neutral (or Net Zero) is defined as "achieving net zero carbon emissions by balancing a measured amount of carbon released with an equivalent amount sequestered or offset. For example, a building with solar panels that sends renewable energy to the grid that is equal to the energy it uses from the grid can be considered carbon neutral.
- 4.6 In March 2019, the Welsh Government published Prosperity for All: A Low Carbon Wales, which sets out the Welsh Government's approach to "cut emissions and increase efficiency in a way that maximises wider benefits for Wales, ensuring a fairer and healthier society. It sets out 100 policies and proposals that directly reduce emissions and support the growth of the low carbon economy". The report references the findings of the UN Intergovernmental Panel on Climate Change, published in advance of the Committee on Climate Change Net Zero report. A 'Low Carbon Wales' sets the foundation for Wales to transition to a low Carbon nation and puts in place and provides a framework that will also enable the Council to demonstrate the steps it is already taking to manage carbon reduction and also to support, inform and supplement a necessarily ambitious plan for the future.
- 4.7 On 2nd May 2019, the Committee on Climate Change (the CCC), an independent, statutory body established under the Climate Change Act 2008 to advise the UK Government and Devolved Administrations on emissions targets and monitor the progress made in reducing greenhouse gas emissions and preparing for climate change, published **Net Zero The UK's contribution to stopping global warming.**
- 4.8 Net Zero is the response to a request from the Governments of the UK, Wales and Scotland, asking the Committee to reassess the UK's long-term emissions targets. The reports key findings are that:
 - The Committee on Climate Change recommends a new emissions target for the UK: net-zero greenhouse gases by 2050.
 - In Scotland, it recommends a net-zero date of 2045, reflecting Scotland's greater relative capacity to remove emissions than the UK as a whole.

- In Wales, it recommends a 95% reduction in greenhouse gases by 2050, due to the extent of the farming industry.
- 4.9 Its conclusion is "A net-zero Green House Gas target for 2050 will deliver on the commitment that the UK made by signing the Paris Agreement. It is achievable with known technologies, alongside improvements in people's lives, and within the expected economic cost that Parliament accepted when it legislated the existing 2050 target for an 80% reduction from 1990.
- 4.10 However, this is only possible if clear, stable and well-designed policies to reduce emissions further are introduced across the economy without delay. Current policy is insufficient for even the existing targets."
- 4.11 It is expected that the governments of the UK will accept the advice of the Committee for Climate Change and adopt these targets which are over and above the commitment made by Rhondda Cynon Taf Council in committing to the UK 100 Commitment.
- 4.12 Further independent scientific research has suggested that unless significant action to reduce the impact of carbon emissions is taken by governments across the world by 2030, the current changes to the climate will be irreversible. The impact of this will be catastrophic, with significant changes to the temperature of the Earth creating rising sea levels, destroying many countries and cities, and forever changing our eco systems that support human life.
- 4.13 In light of this, the Council's Cabinet, in approving to consult on the Council's new Corporate Plan, committed to becoming a Carbon Neutral organisation by 2030 and to work with residents and businesses within the Borough to ensure the whole County Borough is Carbon Neutral as close as possible to the 2030 target.

5 WHAT ACTION DOES THE COUNCIL NEED TO TAKE?

- Over the past 10 years, the Council has invested significant sums in reducing its energy consumption, the energy from which has been derived from fossil fuels. The Council already purchases 100% of its electrical energy supply from renewable energy sources and has reduced its carbon footprint by 37% or 12,725 tonnes over the past five years, Examples of the action taken to date by the Council include:
 - The upgrading of all street lights to efficient LED units and turning off street lights in specific localities;
 - Investing in solar panels, LED lighting, wall and roof insulation, energy efficient gas boilers, and combined heat and power units in

- many schools, leisure centres and council buildings. The solar panels fitted on council buildings are the equivalent size of two football fields;
- Installed electric cooking equipment in all new kitchens to benefit from the renewable electricity we procure;
- Significantly reduced the amount of waste that is disposed of by landfill or through energy for waste;
- Invested in the Healthy Hillsides project with Welsh Government and the Fire Service with benefits for carbon reduction, biodiversity and air quality;
- Through planning agreements with windfarm developers, hundreds of hectares of peat and associated habitats have been targeted for restoration and their carbon and water storage has been increased;
- Invested in 20 micro generation Hydrogen Fuel Cells for our highest energy users (care homes, large schools and leisure centre) with the ambition to do more – this has a significant impact on the emission of greenhouse gases;
- Ensured all new schools and other council buildings are certified as BREEAM "Very Good" or "Excellent" with EPC ratings of A;
- Through various government grant schemes, enabled many residents on low incomes to improve the heat insulation in their own homes;
- Worked with partners to develop renewable energy projects such as, Clydach hydroelectricity, Vattenfall Wind Farm, Gasification Boiler at Ynysangharad War Memorial Park, Bryn Pica Eco Park. Other projects currently under consideration include three smaller wind farms and a solar farm;
- We have received over £450,000 of income from renewable energy generated from Council buildings.
- 5.2 However, there are considerable opportunities to do more.
- 5.3 We need to identify and measure the Council's carbon footprint as a direct response to its own activities. At present, we are required to identify the amount of carbon produced from our energy requirements on which we pay carbon tax, but nothing else. The next stage would involve taking into account the wide range of services and those services provided by other organisations on behalf of the Council. Finally, we would look to work with the communities and businesses within the boundaries of the Council to measure the carbon footprint of the Authority as a whole.
- 5.4 Calculating a baseline of the Council's Carbon and other greenhouse gases will enable the Council to identify short term and long term actions to change the way we work, procure and deliver our services, and highlight those changes that will have the greatest effect on reducing the Council's carbon footprint.

- 5.5 Currently, there is no consistent way of calculating the Carbon emissions baseline, however, Welsh Government has committed to providing detailed guidance and a model which all public bodies can use in April 2020. The advice from the WLGA is to wait a few months and use this consistent WG approved model, as it could become a statutory requirement in the near future.
- 5.6 There are carbon impact models prepared by other research organisations such as the University of Manchester which seek to disaggregate national carbon emissions data and seek to identify sub regional/local authority based emissions. However, when these models disaggregate the data, they fail to take into account the socio-economic factors in each area, the green energy produced within each area, and apply a uniform share of the national carbon effects from air and sea travel, and airports and ports. Therefore, this data is not sufficiently robust upon which to make informed decisions.
- 5.7 Nevertheless, to put into context the impact we, in Rhondda Cynon Taf, are having on the world's climate is: if everyone in the world were to consume the same as the average Welsh citizen, the Stockholm Environmental Institute estimate that just over 2.5 planets would be required. That is to say in order to sustain our current consumption in the long term we would require more than one planet Earth to provide the resources and absorb the wastes. Therefore, we all need to make changes to the way in which we live, work and play to reduce our demands on planet Earth if we are to sustain the current environment.
- 5.8 The Committee on Climate Change Net Zero Report recommends the UK focuses on:
 - Resource and energy efficiency, to reduce the demand for energy across the economy. Without these measures the required amounts of low-carbon power, hydrogen and carbon capture and storage (CCS) would be much higher. In many, though not all, cases they reduce overall costs.
 - Some societal choices that lead to a lower demand for carbonintensive activities, for example an acceleration in the shift towards healthier diets with reduced consumption of beef, lamb and dairy products.
 - Extensive electrification, particularly of transport and heating, supported by a major expansion of renewable and other low-carbon power generation. The scenarios involve around a doubling of electricity demand, with all power produced from low-carbon sources (compared to 50% today). That could for example require 75 GW of offshore wind in 2050, compared to 8 GW today and 30 GW targeted by the Government's sector deal by 2030. 75 GW of offshore wind would require up to 7,500 turbines and could fit within 1-2% of the UK

- seabed, comparable to the area of sites already leased for wind projects by the Crown Estate.
- Development of a hydrogen economy to service demands for some industrial processes, for energy-dense applications in long-distance HGVs and ships, and for electricity and heating in peak periods. By 2050, a new low-carbon industry is needed with UK hydrogen production capacity of comparable size to the UK's current fleet of gas-fired power stations.
- Carbon capture and storage (CCS) in industry, with bioenergy (for Green House Gas (GHG) removal from the atmosphere), and very likely for hydrogen and electricity production. CCS is a necessity not an option. The scenarios involve aggregate annual capture and storage of 75-175 MtCO₂ in 2050, which would require a major CO₂ transport and storage infrastructure servicing at least five clusters and with some CO₂ transported by ships or heavy goods vehicles.
- Changes in the way we farm and use our land to put much more emphasis on carbon sequestration (Carbon sequestration is the process involved in carbon capture and the long-term storage of atmospheric carbon dioxide or other forms of carbon to mitigate or defer global warming such as using trees, hedgerows etc) and biomass production. Enabled by healthier diets and reductions in food waste, our scenarios involve a fifth of UK agricultural land shifting to tree planting, energy crops and peatland restoration.
- 5.9 Taken together, these measures would reduce UK emissions by 95-96% from 1990 to 2050. Tackling the remaining 4-5% would require some use of options that currently appear more speculative. That could involve greater shifts in diet and land use alongside more limited aviation demand growth, a large contribution from emerging technologies to remove CO₂ from the atmosphere (e.g. 'direct air capture'), or successful development of a major supply of carbon-neutral synthetic fuels (e.g. produced from algae or renewable power).
- 5.10 So what does this mean for Rhondda Cynon Taf Council and what are some of the options we should consider if we are to become a "Net Zero" Council? This list below are some examples of actions we could take as a Council, which we will need to consider planning for over the next 12-18 months:

Energy and Energy Efficiency

- Procuring <u>all</u> our Council energy requirements from sustainable green energy sources. This will include reducing our demand for gas by concerting to green electricity, hydrogen and other green energy sources when they become readily available;
- Explore opportunities to create our own green sustainable energy supply from using land in the Council's or NRW's ownership for wind

- farm or solar powered energy. This will include schemes such as the Taffs Well Thermal Spring:
- Offer a grant scheme to residents to convert from coal fired heating systems to initially low energy usage gas fired heating systems;
- Continue to invest in energy and water efficiency technology in our schools and other buildings, such as solar panels, water harvesting etc:
- Through planning policies require large housing and commercial developers to use less energy and manage demand during construction and operation; be clean in exploiting local energy resources (such as secondary heat) and supply energy efficiently and cleanly; and be green: generate, store and use renewable energy onsite;
- Working with Welsh Government and energy suppliers to improve the insulation of homes and other buildings, as a cost effective way of reducing carbon emissions and fuel poverty;
- Ensure that new housing and commercial developments include solar, where feasible, and our planning policies don't restrict solar installation on existing properties.

Mobility

- Ensuring Council vehicles, commissioned home to school transport vehicles, bus operators and taxi vehicles are fit for purpose and are as environmentally friendly as possible. This could involve small cars and vans being electric vehicles and/or hybrid vehicles and the larger HGVs being Euro 6 compliant until such time as the vehicles are fit for purpose. The underlying objective will be to phase out diesel vehicles as soon as is practically possible;
- Supporting installation of infrastructure to fuel zero emission vehicles and encouraging residents to opt to purchase electric vehicles by offering free car parking and use of bus lanes;
- The Council will promote and prioritise more sustainable travel, including walking, cycling and public transport;
- The introduction of the Metro and the increased capacity and frequency will encourage greater sustainable travel;
- The Local Development Plan needs to consider a radically different approach to mobility – to create a socially just, zero-carbon mobility plan. This shifts mobility away from the car by eliminating the conditions that make cars necessary. For example, by 2030, it is estimated that half of all journeys will need to be taken by bus, bike or walking. All remaining journeys will be via electric vehicles.

Greening Our Local Environment

 Afforestation targets for 20,000 hectares per year across the UK nations (due to increase to 27,000 by 2025), are not being delivered, with less than 10,000 hectares planted on average over the last five years. The Council will commit to a comprehensive **tree planting programme** across the County Borough, near roads, in parks and open spaces and across the countryside in partnership with National Resources Wales (NRW). This will need to be well planned and should have a positive impact on reducing the impact of carbon emissions, but also improve air quality, reduce road traffic noise and reduce the risk of flooding;

- Strengthening the Council's Local Development Plan to create a greener built environment that works well with the local environment;
- Reducing pollution from new housing and commercial developments through planning, as well as from existing buildings;
- Targeted measures at air pollution hotspots, such as vehicle restrictions and green infrastructure;
- Prevent and reduce emissions from non-road Council mobile machinery;
- Offering community grants for creating greener space, encouraging community groups to invest in small and medium scale greening projects in urban locations across the County Borough;
- Explore opportunities to create and use our own green sustainable energy such as micro hydro-electric schemes which utilise natural river and water course features;
- Developed a flooding infrastructure programme to ensure the drainage is sufficient to meet the increase in extreme weather events;
- The Council will continue to target its parks and green spaces for investment. This will include working with NRW and other land owners to protect and manage sites of special ecological interest;
- Exceed the Welsh Government waste recycling targets, and ensure that zero municipal waste is landfilled;
- Create a circular approach to recycling and reusing waste material such as plastic at every opportunity. This will include developing the Eco Park at Bryn Pica;
- Eliminate single use plastics and coffee cups etc across schools and other council facilities.
- 5.11 There will inevitably need to be a significant UK wide investment in green energy, in the use of hydrogen and other carbon free energy sources to heat and light homes and businesses across the country. As a Council we will play a role in helping to facilitate these changes.

6 THE PROPOSED WORK PROGRAMME

6.1 Despite, the ambitious targets being recommended by the Committee on Climate Change, the list of potential actions in Paragraph 5.8, that the Council could possibly consider and implement in the future, do not appear unreasonable, and will need to be carefully planned and budgeted for.

- 6.2 Nevertheless, committing to the Net Zero targets will require the Council to revisit its priorities and its budget setting. The Council is consulting on its new Corporate Plan Making A Difference 2020-2024, and it is important that this Plan reflects the commitments and the actions that are necessary for the Council to achieve the 2030 Net Carbon targets.
- 6.3 It is therefore proposed that the Climate Change Cabinet Steering Group meets monthly for the next four months to consider the following reports that set out the actions that need to be included within the Council's Corporate and other plans.

November Meeting:

- Biodiversity Duty;
- Corporate Estates Energy and Carbon Reduction Update;
- Community Use of Underused/Vacant Land.

It is also worth Members of the Steering Group noting the Warmer Homes: A Fuel Poverty Strategy for Rhondda Cynon Taf which was considered at 17th October Cabinet meeting: https://www.rctcbc.gov.uk/EN/Council/CouncillorsCommitteesandMeetings/Meetings/Cabinet/2019/10/17/Reports/Item7WarmerHomesAFuelPovertyStrategyForRhonddaCynonTaf.pdf

The major political parties have recently made some General Election statements/promises in respect of Carbon Neutral homes, and it is likely that the Council's Warmer Homes Strategy could be extended to have a greater impact in the near future. It is estimated that 17% of greenhouse gas emissions are from water and space heating systems in our homes. The opportunity to reduce this energy usage and ensure homes are suitably heated will be a significant benefit to us all.

December Meeting:

- Waste Management how do we attain peak recycling in RCT?

 Welsh Government has set each local authority the target of recycling at least 70% of its household waste by 2025. The Council is already very close to achieving this target. How do we increase our level of ambition to recycle at least 80% of all household waste by 2030? How do we ensure all commercial and other public sector bodies meet similar commitments?:
- Local Procurement of Supplies and Services The Council spends £227m on supplies and services of which £51m is spent with businesses registered in Rhondda Cynon Taf, and £138m on businesses registered in South East Wales. This report sets out targets and plans to significantly increase the amount of money the Council spends locally, initially focusing on small and medium sized companies based in the County Borough, and South East Wales.

- Elimination of single use plastics in all Council contracts and premises – The purpose of this report is to identify all the procurement contracts where the Council purchases single use plastics for its day to day business, including schools, and puts in place a recyclable or carbon friendly alternative;
- Taffs Well Thermal Spring Generating carbon free energy for the community of Taffs Well – A report setting out a proposal for the Council to provide funding to support the Taffs Well Spring Heat Source.

January 2020 Meeting

- Transportation how do we reduce our carbon emissions and change our modes of transport?; - This report will focus on maximising the benefits of the South Wales Metro; consider electrical vehicle charging; opportunities to significantly increase active travel options; how we reduce the impact of the Council's fleet of vehicles, commissioned/subsidised public transport, licenced taxis and home to school transport;
- Air Quality how do we improve air quality, and eliminate the "hotspots", the Air Quality Management Areas in the County Borough – The report will consider what proactive action we can take in the air quality management areas, to ensure air quality improves across the County Borough;
- Community Engagement What can the residents of Rhondda Cynon Taf do to reduce their carbon footprint? How can the Council working with Friends of the Earth, Extinction Rebellion, Greenpeace and other local environmental groups engage residents and businesses to adapt and change how they live their lives to reduce their demand on planet Earth? This will be a joint report with the Community Members of the Steering Group.

February 2020 Meeting

- Energy Generation What opportunities do we have to generate energy on public sector land and/or rivers in Rhondda Cynon Taf – This report will set out a series of proposals for the Council to build and finance potential solar, wind and hydro schemes on Council or other public sector owned land and rivers, that will make a significant contribution to the Council achieving its Carbon Neutral target;
- Nature's Assets Using the Natural Environment to reduce carbon emissions and the effects of climate change – This report will seek to build upon the statutory Biodiversity Report considered in the November Steering Group meeting, and will focus on a range of projects, such as a long term tree planting programme in town centres, schools, public sector land and other sites, which will have a positive impact on improving air quality, supporting flood

- management and prevention schemes, reducing noise and vehicle pollution and generally improving the living environment of residents. We will seek to prepare this report in partnership with National Resources Wales;
- Strategic and Local Development Plans How do we plan for the future, and ensure new homes, new buildings, and other infrastructure are carbon neutral? – The Cardiff Capital Region and the Council are planning to prepare a regional SDP and a RCT LDP. It is essential that these ten year plans include new policies and commitments to ensure our housing, transportation and business infrastructure minimises our carbon footprint and it is fit for purpose in the 21st Century and beyond. This will include commitments to ensure offices and homes are well connected with public and active travel options; town centres become places to live as well as work and socialise; and the natural environment is enhanced.

March 2020 Meeting

- Progress Report on the Commitments and Actions Recommended by the Steering Group to date;
- Other Agenda items to be set by the Community Members of the Steering Group who are invited to bring forward other ideas and options for consideration by the Steering Group. These ideas and options will be shared with Council officers early in the New Year to ensure there is sufficient time for officers to prepare any reports if required and offer any help and support on data analysis or other information gathering to help inform reports.

Future Meetings – possible reports for consideration

- Quantifying Rhondda Cynon Taf's carbon footprint on Wales and the World – This report will seek to use Welsh Government's planned carbon footprint measurement tool to establish a robust baseline for the County Borough and to determine the next steps to prioritise interventions and investments;
- Learning from Best Practice across the UK and the World The report will identify examples of best practice from across the World and consider how the Council, residents and businesses can apply the best practice in Rhondda Cynon Taf to reduce our footprint?.
- 6.4 This draft Work Programme for the Steering Group is flexible and can be changed to meet Members' requirements.

7 **EQUALITY AND DIVERSITY IMPLICATIONS**

7.1 An Equality Impact Assessment is not required with regard to this report.

8 CONSULTATION

8.1 There are no consultation requirements at present but if specific recommendations from individual reports set out in the Steering Group Work Programme are approved by Cabinet, a public consultation will be required later in the financial year.

9 FINANCIAL IMPLICATION(S)

9.1 There are no financial implications aligned to this report. Any investment required to address any of the recommendations will be reported and considered separately.

10 **LEGAL IMPLICATIONS**

10.1 There are no legal implications aligned to this report.

11 LINKS TO THE CORPORATE AND NATIONAL PRIORITIES AND THE WELL-BEING OF FUTURE GENERATIONS ACT

11.1 This report seeks to set out a Work Programme for the Steering Group to develop and recommend to Cabinet a series of proposals and recommendations to reduce the impact the Council and its residents and businesses have on the environment and respond to the issues set out in the Committee on Climate Change Report – Net Zero. The future actions that arise as a result of the recommendations in this report will be considered by the Council's Cabinet and it will take full regard to the seven national wellbeing goals.

12 **CONCLUSION**

12.1 The Council's Cabinet has revisited its commitment to becoming a Carbon Neutral Council, and has set an ambitious target of achieving this by 2030, along with the residents and businesses of the County Borough. This work programme for the Climate Changel Cabinet Steering Group seeks to set out an ambitious programme to enable the Council to achieve the 2030 target, and the Council welcomes input from other organisations and individuals in helping to achieve this ambitious target.

Agenda Item 4

RHONDDA CYNON TAF COUNTY BOROUGH COUNCIL

CLIMATE CHANGE CABINET STEERING GROUP

18TH NOVEMBER 2019

BIODIVERSITY DUTY

REPORT OF THE DIRECTOR PUBLIC HEALTH, PROTECTION & COMMUNITY SERVICES IN DISCUSSION WITH THE CABINET'S CLIMATE CHANGE CHAMPION (COUNCILLOR RHYS LEWIS)

Author: Elizabeth Dean, Environment Planner

1. PURPOSE OF THE REPORT

1.1 The purpose of the report is to update Members on progress in discharging the Council's Biodiversity Duty and to seek approval to submit the required update report to Welsh Government.

2. **RECOMMENDATIONS**

It is recommended that the Steering Group:

- 2.1 Consider the proposed report to Welsh Government on the actions undertaken to further the 'Biodiversity Duty' by Rhondda Cynon Taf Council, and
- 2.2 Subject to any amendments, recommend to Cabinet the submission of the update report to Welsh Government.

3 REASONS FOR RECOMMENDATIONS

3.1 The Council is required, by the provisions of s.6 of the Environment (Wales) Act 2016, to report to Welsh Government on action to comply with the Biodiversity Duty, every three years, with the first report due at the end of 2019.

4. BACKGROUND

- 4.1 The Environment (Wales) Act 2016 contains a new Biodiversity Duty (s.6) which states that public bodies, including Local Authorities:
 - "...must seek to maintain and enhance biodiversity in the exercise of functions in relation to Wales, and in so doing promote the resilience of ecosystems, so far as consistent with the proper exercise of those functions".

4.2 The Biodiversity Duty Report

- 4.2.1 A report setting out proposals for the implementation of the new Biodiversity Duty in Rhondda Cynon Taf was prepared in 2017, in consultation with the Local Biodiversity Action Plan Partnership. The biodiversity duty was discussed with the Council's Senior Leadership Team in October and was considered by the Public Service Delivery, Communities and Prosperity Scrutiny Committee in December 2017.
- 4.2.2 The Report includes a description of the biodiversity of Rhondda Cynon Taf and its contribution to local well-being as well as its national and international value. The report then considers the main impacts of Council services on biodiversity, highlighting areas of good practice and scope for improvement under the following themes:
 - public engagement,
 - planning,
 - estate management,
 - water management,
 - education.
 - advice to the public,
 - corporate planning,
 - working with neighbours and statutory bodies

4.3 The Council's response to Net Zero – The Committee on Climate Change

- 4.3.1 Climate change and biodiversity are interdependent. Many of the underlying drivers of climate change also affect wildlife, for example pollution and land use change. Also, as the climate changes habitats and species need to adapt or move if they are to survive. Biodiversity makes an essential contribution to natural processes such as carbon storage in plants and the movement of water through the landscape. Biodiversity is central to 'ecosystem resilience', which is the focus of both the Environment (Wales) Act and the Resilience Goal in the Wellbeing of Future Generations Act.
- 4.3.2 Following the recommendations of the Cabinet (18/06/19), further work on biodiversity and climate change is proposed within the context of the new draft Corporate Plan. This will build on current programmes, such as the restoration of extensive peat-bogs and upland heath through planning agreements with windfarm developers. For example, the joint working with Neath Port Talbot at the Penycymoedd wind farm has recently attracted additional funding from The Heritage Lottery for the 'Lost Peatlands' project. The Healthy Hillsides project is another

example of a successful project, piloted in Rhondda Cynon Taf, which may now receive additional funding from Welsh Government, allowing further sites in RCT and elsewhere to be brought into conservation management. The project, which is co-ordinated by the Wildlife Trust has been targeted at sites with a history of wild fire and involves the Council, the Fire Service, specialist organisations such as Butterfly Conservation and PONT (conservation grazing) and other landowners such as Llantrisant Town Trust.

- 4.3.3 The County Borough is one of the most wooded in Wales, with approximately one third of the area wooded. In recent historical terms, woodland cover has increased significantly and much of this has been through natural woodland regeneration. The County Borough has unusually high levels of urban tree cover (in gardens, parks, transport corridors etc.) at 18.5% compared with a Wales average of 16.3%. The management of much of this woodland falls within the Council's remit, providing not only carbon storage, landscape, wildlife and aesthetic benefits but also shade and shelter for residents as the climate warms and water interception and storage if rainfall increases. The impact of increased storminess due to climate breakdown is also a management consideration.
- 4.3.4 The important role of undisturbed soils and natural vegetation in storing carbon has been recognised by the Council. Delivering natural carbon storage solutions, such as those provided by trees, peatbogs, heathlands, dry and marshy grassland and other natural habitats across the County Borough will help to reduce the impact of greenhouse gasses and enhance air quality. Understanding and including natural working with natural processes, woodland regeneration, will help the Council to achieve both climate and biodiversity benefits through an approach which will be cost effective, sustainable and multi-outcome.

4.4 The Action Plan Spreadsheet

- 4.4.1 An Action Plan spreadsheet has been set up to monitor progress against the proposed actions. The actions include matters identified in the 2017 report and actions arising from the Service Self Evaluation process (see below). A number of new opportunities have also been included.
- 4.4.2 Members will be aware that as part of the Council's performance management arrangements a Service Self Evaluation (SSE) is undertaken by each Council service in the autumn to inform the Service Delivery Plans for the forthcoming year. The inclusion of a 'Biodiversity Duty' question in 2017 provided a baseline and some initial priorities for the Action Plan. The follow up question, in the SSE 2018, provided additional information.

- 4.4.3 The actions are grouped under the themes listed above. Each Action is classified as either a 'project' or 'on-going' and the lead officer identified. Columns provide for the start date, progress 17/18, progress 18/19, progress 19/20, comments and completion date to be recorded.
- 4.4.4 A copy of the Biodiversity Duty Action Spreadsheet (A3) is appended to this report.

4.5 Statutory Report to Welsh Government

4.5.1 Subject to members' approval, the 2017 Biodiversity Duty Report (appendix 1) and the 2019 Biodiversity Duty Action Plan Spreadsheet (appendix 2) will comprise the Council's first submission to Welsh Government with regard to the provisions of S6 of the Environment (Wales) Act 2016.

4.6 Review of the Biodiversity Duty Report and Action Plan Spreadsheet

4.6.1 Following submission to Welsh Government, the Biodiversity Duty Report will be published on the Council's website.

'Action for Nature: the Local Biodiversity Action Plan for Rhondda Cynon Taf' is currently being reviewed by the Local Biodiversity Action Plan Partnership. The plan can be viewed at the following link:

https://www.rctcbc.gov.uk/EN/Resident/PlanningandBuildingChange/Countryside/Biodiversity/ActionforNature.aspx

This work will provide an opportunity for members of the public, wildlife and community organisations, and public bodies to contribute their projects and ideas for the conservation of wildlife across Rhondda Cynon Taf. Additional themes or actions that come forward, which are relevant to the Council's Biodiversity Duty, will be considered for inclusion for the next 'Biodiversity Duty' reporting round. A further report will be brought to Members in this regard.

5. **EQUALITY AND DIVERSITY IMPLICATIONS**

5.1 There are no equality or diversity implications as a result of the recommendations set out in the report.

6. CONSULTATION / INVOLVEMENT

6.1 The initial input from the Local Biodiversity Action Plan Partnership, Scrutiny Committee and the Senior Leadership Team, together with the

Service Self Evaluation process has enabled a wide range of interests and expertise to contribute to the Biodiversity Duty Action Plan and reporting process. The views of this Scrutiny Committee will inform the deliberations of Cabinet.

6.2 The review of the Biodiversity Duty Plan and the next three year reporting round will reflect the results of a wider public involvement in the review of *Action for Nature* described in para 4.5 above.

7. FINANCIAL IMPLICATION(S)

7.1 There are no financial implications associated with this report. However, financial implications may arise in association with the actions the Council undertakes to comply with the Duty and these will be considered as and when necessary.

8. LEGAL IMPLICATIONS OR LEGISLATION CONSIDERED

8.1 The Council has a statutory duty to prepare a plan of action regarding the Biodiversity Duty and to report to Welsh Government, as set out in S.6 of the Environment (Wales) Act 2016.

9. <u>LINKS TO THE CORPORATE AND NATIONAL PRIORITIES AND THE WELL-BEING OF FUTURE GENERATIONS ACT</u>

9.1 The Biodiversity Duty contributes to a number of the Wellbeing Objectives within the Council's Corporate Plan 2016-2020. In the Corporate Performance Reports, Biodiversity is a cross cutting theme. This reflects the ways of working promoted in the Well-being of Future Generations Act.

10. CONCLUSION

10.1 The Council is required to report progress in the discharge of its biodiversity duty to Welsh Government. The report and the action plan presented at Appendix 1 & 2 present the current position and Members are asked to consider and approve this report for submission to Welsh Government.

BIODIVERSITY DUTY

REPORT OF THE DIRECTOR PUBLIC HEALTH, PROTECTION & COMMUNITY SERVICES IN DISCUSSION WITH COUNCILLOR ANN CRIMMINGS, CABINET MEMBER FOR ENVIRONMENT, LEISURE AND & HERITAGE SERVICES

Background papers:

Officer to contact: Elizabeth Dean, Environment Planner

Biodiversity Duty in Rhondda Cynon Taf (2017)

1. Introduction

In March 2016 the Environment (Wales) Act came in to force. Its purpose is to secure healthy, resilient and productive ecosystems in Wales, while still meeting the challenges of creating jobs, housing and infrastructure. The Act provides a framework for a more integrated approach to managing natural resources, ensuring that long—term sustainability will be a core consideration in all decision making.

The **New Biodiversity Duty** will help reverse the decline and secure the long term resilience of biodiversity in Wales. The Act requires Welsh Government, Natural Resources Wales, and all public authorities (including Local Authorities)

"to seek to maintain and enhance biodiversity in the exercise of functions in relation to Wales, and in so doing, promote the resilience of ecosystems so far as consistent with the proper exercise of those functions".

The Local Authority should prepare a Plan setting out what it proposes to do to comply with the new Duty. The local authority is required to report to Welsh Government on action to comply with the new Duty, every three years, with the first report due at the end of 2019.

This document sets out proposals for the implementation of the new biodiversity duty in Rhondda Cynon Taf. It includes a 'biodiversity tour' of Rhondda Cynon Taf, a description of the contribution of biodiversity to local well-being as well as its national and international value. This provides the context for the implementation of the Duty across all Local Authority functions. The proposals focus on the most significant areas for biodiversity impact, with scope for modification as our knowledge and understanding grows. The proposals are being developed collaboratively with stakeholders across the authority, with partners and interested members of the public. They seek to identify and build on areas of good practice, aiming for continuous improvement across all relevant Council services.

The Environment (Wales) Act 2016 is part of a suite of interrelated legislation including the Well-being of Future Generations Act 2015 and the Planning (Wales) Act 2015 (see Appendix One below). The Biodiversity Duty will be of relevance for the Public Service Board in the production of the Well-being Plan for Cwm Taf, contributing in particular to the goal of creating 'A Resilient Wales'. (see http://gov.wales/docs/desh/publications/160225-spsf-2-individual-role-en.pdf)

2. Biodiversity in Rhondda Cynon Taf

'The south Wales Valleys support a treasure trove of biodiversity. Like all good treasure troves it had been lost and long forgotten and has only now been re-found, and like some giant archaeological dig, one discovery has led to another; one find has spurred on the finding of the next.

Local people have started to see how their valued local patch fits into a bigger context and experts have gradually realised the significance of our biodiversity. The surprise is the greater because the Valleys have been viewed as derelict and despoiled, depressed and degraded. This is surely the last place biodiversity would thrive? However, the reality is very different. With an open mind (and a little knowledge) the secret behind the success of Valleys biodiversity is obvious. Partly as result of nutrient poor but varied soils, partly because of an intense and complex topography, geomorphology and geology, partly down to our wonderful mild wet climate, partly due to traditional small farm management and the Valleys industrial legacy, and partly due to the daily interactions of people with their environment: all of the components for a rich biodiversity are in place. Blessed with this heady mix of conditions and circumstances, the South Wales Valleys support a range and variety of lowland and upland habitats, which is not bettered anywhere in southern Britain. Rhondda Cynon Taf lies at the heart of the Valleys and at the heart of this wealth of biodiversity. This is where landscape and biodiversity come together, where the views have biodiversity substance and depth. This is no shallow and brittle postcard image based on pretence and faded reputation. This is a biodiverse landscape, which is 'breath-taking', and dynamic, and integral to a unique sense of place and belonging. To prove a point let us take a quick tour of Rhondda Cynon Taf. But where should we start?

Perhaps we should begin in the high-hedged, rhos pastures of the lower Ely and Taff Valleys, and the pastures of the Upper Cynon Valley. Here internationally important communities of purple moor-grass and rush pasture are still characteristic landscape features. These **rhos pasture** flower in summer with devil's-bit scabious, meadow thistle and heath spotted orchid and host precious colonies of marsh fritillary and small pearl-bordered fritillary butterflies. No planned landscape this, ancient field patterns are marked by even more ancient hedge-banks cut from the original 'wildwood'. Dormice find a home in the **hedgerows** of hazel, oak, ash, hawthorn, sallow, blackthorn, rose, dogwood, spindle and holly, and through this network of hedgerows our remnant ancient woodlands stay connected and viable.

The valley sides of the Rhondda, Cynon and Taff illustrate biodiversity connectivity beautifully. From any bus stop in Pontypridd, or Porth, or Aberdare or Mountain Ash look up at the complex of habitats which forms the valley side **ffridd**. A complex

mixture of acid grassland, heath, bracken, woodland, scrub and flushes runs for mile on mile along our main valleys: interconnected in an ever-changing intricate habitat mosaic. The ffridd is home to bluebells, lizards, slow worms, grayling butterflies and rare upland bumblebees. Bracken slopes with abundant dog violets are important habitat for fritillary butterflies including important dark green fritillary populations (and potentially the rare high brown fritillary). Now if you look closer you can see the signs of colliery spoil, small drift workings, egg shaped mounds, and, if you are lucky you'll find one of our remaining tip systems, constructions, which rival the Celtic Hill Forts of Dorset. Sites such as the Gelli Tips, Old Smokey, Wattstown and Dare Valley Tips tell an often hard and tragic story, but now support habitats of enormous biodiversity and cultural value. These are landforms of unique value and a living testimony to a sense of place, which is still strong in our mining valleys. Coal tips are proving particularly important for their lichen-heath communities in which heathland grows amongst white, encrusted mats of cladonia lichens. Some of the best examples of lichen-heath in Wales occur on old coal spoil tips in Rhondda Cynon Taf. Recent work has confirmed how important these tips are as invertebrate habitat: survey work on 5 RCT Tips has recorded 85 bee species (including scare and rare species), this is half the known Welsh bee fauna and a third of the UK list.

From a coal tip, created in the 1890s, wander straight into an **ancient upland oak wood** where stunted welsh oaks cling to the valleyside, with a carpeted ground flora of wimberry, heather, ferns, mosses and exposed slabs of pennant sandstone, with their lichen rich bedding planes. These sheep grazed woods are home to classic Welsh woodland songbirds: redstart, wood warbler and tree pipit. In the valleys bottoms **mixed deciduous woodlands** supports oak, ash, sycamore and wych elm with alder and willow on wetter ground. Here there is a rich understorey of hazel coppice and holly, and on the southern limestone dogwood, spindle, and field maple and even the occasional wayfaring tree. These woods have wonderful ground floras with bluebell, wood anemones, violets, sanicle, wild garlic, primroses, mochatel, twayblades and toothwort. The recovery of woodland fungi and lichen communities is testimony to the clean air. Branches, bowls and twigs are cloaked in a multitude of lichens and tree fungi: rare things like willow glove and golden-eye lichen have recently been found, rare things wait to be found: these are exciting times for our local lichenologists and mycologists.

Stand on a summer's evening in the courtyard of an ancient farm, or barn, or terraced house and count the bats tumbling out of their daytime roosts. On an autumn dawn, shiver by a disused railway tunnel or mine adit and watch for swarming bats (a prelude to hibernation) – perhaps you'll be the one to discover a major bat hibernation site. RCT supports at least 13 species of bats, including rare things like barbastrelle and lesser horseshoe. On the other end of the scale, Pontypridd is known by bat surveyors as 'Pip City', an affectionate reference to the abundance of common and soprano pipistrelle bats living in the town.

Certain habitats can be 'traced back' to the retreat of the last ice sheet 8,000 years ago. Much of our **peatbog** habitat started to form at that time, as glacial lakes, hollows and upland plateaus gradually succeeded through fens, and swamp into peat. These quaking, shaking wonders are home to cranberry, sundews and bog asphodel which flower amongst the sphagnum peat-mosses and the tussocks of moor-grass and deer grass. These are places where the occasional snipe still breeds. Llantrisant Common, Hirwaun and Tonyrefail are particularly important areas for lowland bogs, with peat and pollen records which chart the changing face of vegetation over 8 millennia. History can be traced deep beneath 9 metres of peat, deep down to the remnant water of the lost glacial lake. Misused and misunderstood these lowland bogs have somehow survived and now efforts to conserve and restore them have begun. In the uplands our extensive blanket bogs were similarly treated, drained for pasture or afforested with sitka spruce. However now, where the wind turbines turn, you will also find extensive peat-bog restoration, delivered as planning permission requirements. In the years to come there is the prospect to recover hundreds of hectares of upland peat bog, swaying in the summer breeze with hundreds of thousands of cotton-grass heads, holding atmospheric carbon, and naturally storing and controlling upland storm water to provide the 'greenest of green' flood protection for the Valley communities below. You may feel a wave of hope that perhaps we do have the capacity to learn? This is wilderness, but wilderness close to home and a biodiversity, which is largely un-chartered and unknown. While you are there, make sure to dip into a forestry plantation edge where siskin and crossbill abound, club-mosses shelter, heronries sway in western hemlocks and at summer dusks, nightjars 'churr'.

In early June take the time to visit your local **species-rich grassland**, a hay meadow or cow or pony grazed pasture: in the winter it may just look like a field but in the early summer the floristic display is proof of another nationally rare habitat. We are very lucky in Rhondda Cynon Taf to still have a superb grassland heritage, which is a vibrant part of our biodiversity fabric. Pastures and road verges are places where flower rich displays of birds-foot trefoil, black knapweed, ox-eye daisy, commonspotted orchid rough hawkbit and red clover thrive: in which common blue butterflies, mother shipton moths, grasshoppers and countless bees flit, hum and buzz. The dry grasslands of the upper valleys slopes are more acidic but just as beautiful with heath bedstraw, tormentil, greater burnet, bluebell and sheep sorrel, while on the limestone there are cowslips and bee orchids. In the autumn, on a bright sunny morning visit and look for another indicator of biodiversity wealth, the reds, oranges, yellows and purples of wax cap fungi.

On a summer's day pause and cool your feet in a upland stream, or meander along the Cynon, Rhondda, Ely or Taff. **Rivers** which forty years ago were dead and lifeless and are now healthy, biodiverse watercourses, home to multitudes of stone

4

and mayflies, dipper, grey wagtail, brown tout and, of course, otter. All our main rivers once had floodplains. Places were winter floodwater spill, and **floodplain** grassland, woodland and wetland flourish. Pant Marsh at Talbot Green is home to species-rich grasslands and flag iris, just up the road Coedcae Marsh has sedge beds, adder, and marsh cinquefoil. The lagoons and wet pastures of Tirfounder Fields, Aberdare supports regionally important numbers of breeding and wintering water birds, grass snake and dragonflies. These stunning landscapes hold and gently release storm water, precious wildlife refuges which save our living room carpets from flood.

On a crisp winters day take in our glacial landscapes and the cwms: birthplaces of the glaciers, which gouged and ground out the valleys. Marvel at the majesty of Cwm Parc, Cwm Saebren and Cwm Dare. These most southerly **glacial cwms** in the UK are home to peregrine falcons and stranded arctic alpine plants – flowers and ferns, which cling to the coolest, shadiest ledges and wait in hope for tundra summers to return. At the head of the Rhondda Fawr stand in the terrace streets of an alpine village called Blaenrhondda and feel the presence of Pen Pych rise above. Travel up the Rhondda Fach to the scree slopes of Cefn Craig Amos and Tarren Maerdy, where from their school desks kids from Maerdy Comp compose words and pictures from the jumble of frost, shattered sandstone on the hillside backdrop to their school.

Where industry has been cleared, experience some 'brownfield' biodiversity. Post-industrial sites often support amazing mosaics of grassland, wetland and woodland habitats all naturally developed on apparently derelict land. These eclectic mixtures of habitats hold many a biodiversity surprise and a home to newts, frogs, dingy skipper butterflies and red-belted clearwing moths.

Whichever way you wandered, on the way home count the ferns in your neighbour's front wall, can you find the classic four of harts-tongue, maidenhair-spleenwort, rustyback and wall rue? Make a note to take more care when you next re-point your wall and try to encourage your own fern garden. At the gate pause and watch a leaf-cutter bees ferrying neatly rolled leaves to nest chambers in the drainage holes of your UVPC double-glazed windows. Look up, and marvel that your swifts in the loft and house martins under the eaves have come back to you from across the Sahara and far beyond, and a thousand places you'll never see. Feel equal pride that your year-round house sparrows can nest and 'chirrup' from your bird-friendly soffit boards. Also, with your trusty moth trap you can boast a list of 300 macro-moths in your terrace garden, 50 bee species (with lawn full of hill solitary bee mounds), twenty frogs in the pond and dozens of slow worms in the compost heap. After all, biodiversity does start at home.'

3. Biodiversity's contribution to local well-being and its national and international value

The public engagement undertaken for the Natural Resources Wales Rhondda Pilot in 2015/16 and the Well-being Assessment undertaken for Cwm Taf in 2016/17 have both highlighted the importance of the landscape and wildlife to local people. It is one of the assets which people value and it contributes to their sense of place and to local culture. The importance of 'the outdoors' for both physical and mental health was widely recognised. Some people also expressed interest in becoming more involved in looking after local green space.

Under S.7 of the Environment Act, Welsh Government publishes lists of the habitats and species of principal importance in Wales. In Rhondda Cynon Taf, most of the terrestrial habitats are represented and a large number of the species, reflecting how valuable our biodiversity is in a national and international context. Perhaps most telling is the extent of the 'priority habitats' in RCT (20% of the non forested area) and Merthyr (23%) compared with a Glamorgan figure of 16% and Wales as a whole at 18%. See appendix 2

The extent of semi-natural habitat, the diversity of habitat types and the 'connectivity' both from the lowlands to the uplands and from the south to the north are among the reasons why the valleys are so important for biodiversity in Wales.

4. Significant areas of biodiversity impact

4.1 Public engagement with biodiversity in RCT

The knowledge and understanding of local biodiversity generated by local people should not be underestimated. From the heyday of the Victorian naturalist to the present, an interest in their local environment has inspired, enthralled and entertained. It is a pastime that can provide pleasure to many, regardless of income or education. In the past, few professional ecologists visited the area compared with the national parks or the coast, little was written about the Valleys in academic journals and local knowledge remained largely untapped. Since the advent of Biodiversity Action Planning (arising from commitments at the Rio Earth Summit in 1992 and subsequent UK and Welsh Government policy) the importance of the Valleys for biodiversity has been recognised. Professional ecologists are now more engaged locally, but typically their work is task orientated such as the detailed surveys required for a proposed development site, or river sampling to assess pollution levels. This data is very useful and adds to our knowledge but it cannot replace the day to day observations, enthusiasms and expertise for both common and rare wildlife that comes from local people.

The Local Biodiversity Action Plan partnership was established in Rhondda Cynon Taf in 1997, along with similar partnerships across Wales. The partnership was set up to prepare a Local Biodiversity Action Plan for the area. Anyone with an interest in wildlife was encouraged to join, so that local knowledge and understanding would inform and shape the Plan. The Partnership continues to review, update and implement the action plan and to support, develop and celebrate local expertise.

The Council has also developed strong relationships with specialist voluntary organisations such as the Wildlife Trust, Butterfly Conservation, Glamorgan Bird Club, PONT (an organisation promoting conservation grazing) and the South East Wales Biodiversity Recording Centre (SEWBREC) who can provide specialist advice and volunteer support for joint projects.

There is potential for public engagement to be further developed both to sustain, support and develop local capacity and for local knowledge and expertise to be more widely used within the Council. For example SEWBREC currently provide information to support the Planning function, but there could be advantages for other departments as well. There is also potential to promote the wildlife value of Council owned land and explore opportunities to link local communities to local wildlife sites.

4.2 Biodiversity and the Planning System

The Local Development Plan for Rhondda Cynon Taf (2011) and the associated Supplementary Planning Guidance, for Nature Conservation and for Planning Obligations and the Community Infrastructure Levy, provides the framework for the protection and enhancement of biodiversity in the statutory land-use planning process. Nationally protected sites such as Special Areas of Conservation (SAC) and Sites of Special Scientific Interest (SSSI) are underpinned by local Sites of Importance for Nature Conservation (SINC) which have been identified in the Local Development Plan. Development proposals should avoid damage to the biodiversity value of these sites. To ensure decisions are soundly based, SEWBREC supply the Council with data regarding planning applications and where appropriate developers must supply adequate information about the habitats and species present on the site, the impact of their proposals and any mitigation or enhancement proposed. The Council's ecologist provides advice to the Development Management team and assists in the negotiation of S106 and similar agreements with developers to ensure the protection of biodiversity features on development sites and their long term management, typically for 25 years. For protected species, such as bats, protocols have been developed to minimise risks for both the developer and the council.

Much of the current planning work is being taken forward at a regional level. The Valleys Task force, the Cardiff City Region Deal, the strategic plan for the Cardiff region etc. will all need to address the Biodiversity Duty, as will the review of the Local Development Plan. Monitoring outcomes and collating evidence of the multiple benefits of current policies (for public open space, children's play, active travel, landscape, flood risk reduction, wildfire risk reduction, carbon and water storage as well as biodiversity) will be an important consideration.

4.3 Biodiversity and land /estate management

The Council has extensive land and property holdings across the County Borough. The portfolio includes offices, schools, roads and parks plus many amenity areas in housing developments, town centre public spaces and extensive former land reclamation sites and old railway lines. The management of this estate can make an important contribution to biodiversity. For example, the NRW 'Rhondda Pilot' in 2014-16 identified that in excess of 60% of the land in Rhondda is in public ownership (NRW and Council). There are examples of good practice in land and

7

Biodiversity is the variety of life on earth, and includes all species of plants and animals and the natural systems that support them

property management, for example protocols relating to essential maintenance works undertaken in the bird nesting season, the introduction of biodiversity management of road verges and the use of conservation grazing to reduce wildfire risk.

There is a need to better understand both the opportunities and the constraints for developing good practice further. Council proposals for development and protocols relating to the disposal of assets are two areas where further work is proposed.

4.4 Biodiversity and water management

The local authority has a variety of responsibilities relating to water including ordinary watercourse consents, flood risk management planning and water pollution prevention. In many of these areas Natural Resources Wales have parallel powers relating to the main rivers. The flood risk management plan for RCT has been informed by an understanding of the geology, topography, climate, biodiversity and industrial history of the County Borough. The constricted and heavily developed valley floor, the steep valley sides, the historic use of culverts where the watercourses meet the built up area and the high rainfall totals all contribute to the flood risk. Upstream management, including restoring peat-bogs on the extensive upland plateau has been identified as a potential risk reduction option. This has been taken forward in planning agreements negotiated as part of wind farm planning consents

Good practice is being developed in relation to ordinary water course consents and there is potential for closer integration with development management, for more sustainable drainage systems in new developments (SUDS) and for reducing water pollution.

4.5 Biodiversity and education

The local authority has overall responsibility for education within the County Borough, although most of the service delivery is delegated to schools. The land and buildings are subject to the same biodiversity considerations as the rest of the Council's holdings, however there will be additional opportunities for schools to develop and use their grounds for outdoor teaching and learning, including about biodiversity. A number of schools have taken advantage of the Tidy Towns initiative, where the Keep Wales Tidy community officer and a council team can assist in developing outdoor classrooms, gardens, food growing and woodland areas.

Learning outside the classroom can provide memorable experiences for pupils, spark an interest in wildlife, encourage countryside care and citizenship as well as the beneficial educational outcomes. The early years curriculum (foundation phase), promotes outdoor learning. 'Walk to the Wild' has been developed to assist schools to use wild spaces, typically in Council ownership, within walking distance of the school, for half day curriculum based outdoor learning sessions, particularly for Key Stage Two.

There is scope to develop the opportunities for schools to learn more about local wildlife, to increase outdoor learning both in school grounds and in the locality.

Biodiversity is the variety of life on earth, and includes all species of plants and animals and the natural systems that support them

There may also be opportunities to work with the youth service, libraries, informal and continuing education.

4.6 Biodiversity and advice to the public

Many Council officers provide advice to the public and some of this may create opportunities or have implications for biodiversity. Obvious examples include advice regarding invasive species or pest control where good practice has been developed. Generally speaking, where there is a good understanding of biodiversity in relation to Council policy and practice, this will feed through to public advice.

There are opportunities to develop this, for example through the Council's website. There may also be opportunities relating to advice about training and career development.

4.7 Biodiversity and corporate planning

The Well-being of Future Generations Act 2015 has established a new framework for corporate planning, based on seven goals for wellbeing in Wales and five ways of working. Biodiversity is explicitly recognised as a contributing factor in creating a resilient Wales and this, combined with the new Biodiversity Duty in the Environment (Wales) Act 2016, should ensure that biodiversity is considered. A short section on biodiversity has been included in the 2016/17 Corporate Performance Report and the Biodiversity Duty requirements have been included in the 'Place' element of the refreshed Corporate Plan. The Service Self Assessment for autumn 2017 includes a section on biodiversity that will provide a baseline for reporting and inform the 2018/19 Service Delivery Plans.

The public consultation for the well-being assessment in summer 2016 identified wildlife, local landscape quality and outdoor activity as important to peoples' well-being. The environmental assessment also highlighted the importance of biodiversity as an asset for Cwm Taf. The assessment was published in March 2017 and the Wellbeing Plan will be completed by May 2018.

There are examples of good practice in Service level planning. The Local Development Plan and the Flood Risk Management Plan are examples where biodiversity has been an integral consideration. Future opportunities include emergency planning, the 21st Century schools programme and the Local Transport Plan.

4.8 Working with neighbouring authorities and other statutory bodies

Much of the work of the local authority is undertaken in partnership with neighbouring or similar authorities, or with other statutory bodies. The appropriate scale for biodiversity action can vary from very local, to regional and national. The joint working with Neath Port Talbot and Natural Resources Wales to restore peat bog and heath land on Penycymoedd wind farm is one example. The coal and mineral spoil working group (led by Merthyr Tydfil) is a broader initiative considering industrial and cultural heritage, the geology, biodiversity, landscape and amenity value of old coal spoil tips cross the Valleys area. 'Healthy Hillsides' is a joint project

9

between the Council, NRW, the Fire Service and the Wildlife Trust to manage the hillsides for biodiversity and reduce the risk of wildfire. Housing Associations have also developed best practice, for example in relation to bats and nesting birds in building refurbishment.

NRW is the main statutory body with biodiversity responsibilities. NRW is represented on the Public Service Board for Cwm Taf and will prepare an Area Statement to inform local decision making. NRW also has statutory responsibilities relating to the planning process, protected species, SSSIs and SACs and provides advice through the area and supports the Local Biodiversity Action Plan partnership. NRW is also a major landowner in RCT managing the public forest estate. All public bodies will be subject to the Biodiversity Duty and this, combined with the requirements of the WFG Act, may lead to new ways of working with the Council.

There is scope to develop joint working further. When resources are scare, collaboration can help make progress that would not be possible alone.

4.9 Other aspects as identified

It is anticipated that there will be other areas of Council work with opportunities or implications for biodiversity that are revealed as discussions with stakeholders proceed. There is scope for these to be added to the continuous improvement action plan.

5. Monitoring and reporting

A spreadsheet of actions for continuous improvement is being developed to support the Biodiversity Duty. The Council is required to report to Welsh Government by December 2019, and subsequently every three years, on progress made in implementing the Duty. This report and the associated spreadsheet will provide the information to meet this requirement.

Legislation for sustainable development to secure the long term well-being of Wales

For Wales to develop sustainably, we need to change the law to put in place the key elements that will enable it to happen:

- . A clear idea of what we are aiming for and an undertaking of the key principles that guide us;
- A clear picture of the natural resources we have, the risks they face and the opportunities they provide; and.
- . An efficient process that ensures the right development is located in the right place to make it happen.

RHONDDA CYNON TAF COUNTY BOROUGH COUNCIL

CLIMATE CHANGE CABINET STEERING GROUP

18TH NOVEMBER 2019

CORPORATE ESTATES ENERGY AND CARBON REDUCTION UPDATE

REPORT OF THE DIRECTOR OF CORPORATE ESTATES IN DISCUSSION WITH THE CABINET'S CLIMATE CHANGE CHAMPION (COUNCILLOR RHYS LEWIS)

Author(s): David Powell, Director of Corporate Estates and Steve Lock, Head of Energy Project Management.

1. PURPOSE OF THE REPORT

1.1 The purpose of the report is to provide supporting information for the Discussion Paper – Work Programme for the Climate Change Cabinet Steering Group meeting. The report outlines the current situation and relevant developments with regards to Energy and Carbon Reduction.

2. **RECOMMENDATIONS**

It is recommended that the Steering Group:

2.1 Note the contents of this report as part of the supporting information for the Discussion Paper – Work Programme for the Climate Change Cabinet Steering Group meeting.

3. REASONS FOR RECOMMENDATIONS

3.1 The contents of this report provides key background information for the Discussion Paper – Work Programme for the Climate Change Cabinet Steering Group meeting.

4. ENERGY USAGE AND REDUCTION STRATEGIES

- 4.1 Rhondda Cynon Taf Council has a long-established and large-scale programme of investing in Energy Reduction measures. In the last 10 years over £7m has been invested and these have directly resulted in estimated Energy reductions of over 18m MW of Energy.
- 4.2. The investments made over the last 10 years have been spread across nearly 400 projects including the installation of 105 Solar panel arrays

- across both Schools and Corporate Buildings (totalling 1.58MW), 212 LED lighting schemes (saving £3.2m) and in recent years the installation of 20 Hydrogen Fuel Cell installations.
- 4.3 There has also been a very considerable investment in more Energy efficient Street Lighting. All Street lights in the County Borough have now been converted to their LED equivalent and this, along with part night and dimming policies, has resulted in a 75% reduction in the energy used.
- 4.4 In addition to the main investment areas listed above there has also been good progress on a number of other initiatives;
 - Support has been provided for the development of community micro-hydro at Clydach and other potential hydro schemes are being investigated.
 - The use of geo-thermal/underground energy sources is being actively pursued with the first ground source heat pumps being recently installed, a current project to beneficially use the water from the Taffs Well Thermal Spring (using a water sourced heat pump) and a potential project to understand and develop the additional opportunity that residual Minewater could offer across the area.
 - Biomass boilers have been installed in a number of RCT locations and although there have been some operating issues there are nine boilers currently in use, consuming sustainable wood pellets.
 - Water Management issues have also been positively addressed with numerous actions taken to reduce water consumption and limit wastage such as the use of push-only taps and reduced flush cisterns. All new developments are installed incorporating leak detection systems to help with water conservation.
 - New projects also benefit from a wide range of measures incorporated to assist with the Building Research Establishment Environmental Assessment Method (BREEAM) 'Excellent' rating such as rainwater harvesting, LED lighting and smart Building Management Systems (BMS).
- 4.5 The purchase of Energy (electricity and gas) is a major area of expenditure for the Council. The various Energy efficiency measures taken over recent years have substantially reduced the Council's Energy consumption.
- 4.6 The scale and value of Energy consumption by the Council means that its purchase is subject to and regulated by the EU Procurement Directives. Both electricity and gas are purchased via a legally compliant public sector contract arrangement and as part of this

- arrangement all the electricity purchased comes from certified renewable sources.
- 4.7 The Energy Invest to Save programme for Financial Year 2020/21 is in the process of being finalised but is envisaged to commit the Council to invest at least a further £1.4m on energy and carbon reduction improvements. Furthermore, a list of other potential energy efficiency projects with longer viability periods has also been developed for further consideration and possible additional investment.

5. POTENTIAL RENEWABLE ENERGY PROJECTS

5.1 There are currently several projects undergoing advanced feasibility/investigation with regards to the potential of large renewable Energy projects. Three of these potential projects are Wind-based and one is Solar-based. These projects would be developed by Rhondda Cynon Taf Council and as such would both contribute to the increase in the renewable energy provision in the area and also make a positive economic contribution to the financial situation of the County Borough which could then be invested in further related improvements or other services for the benefit of citizens.

6. CARBON REDUCTION

- 6.1 As part of its commitment to reduce Energy consumption and its legal obligations, the Council has also actively monitored its Carbon situation. Until April 2019 this was via the Carbon Reduction Commitment Scheme (CRC) and is now via the new Climate Change Levy Scheme (CCL).
- 6.2 In the 10 years until April 2019 (when the new scheme started) we have achieved an actual Carbon saving of over 6.6m tonnes, which includes reductions in the emissions from our buildings, street lights and other areas.

7. EQUALITY AND DIVERSITY IMPLICATIONS

7.1 An Equality Impact Assessment is not required with regard to this report.

8. CONSULTATION

8.1 There are no consultation requirements at present with regards to this supporting report.

9. <u>FINANCIAL IMPLICATION(S)</u>

9.1 All existing 'live' projects are funded through relevant cost centres so there are no further financial implications aligned to this supporting report.

10. LEGAL IMPLICATIONS

10.1 There are no legal implications aligned to this report

11. <u>LINKS TO THE CORPORATE AND NATIONAL PRIORITIES AND THE WELL-BEING OF FUTURE GENERATIONS ACT.</u>

11.1 This supporting report provides information in the area of 'Corporate Estates Energy and Carbon Reduction' for the main Discussion Paper – Work Programme for the Climate Change Cabinet Steering Group. The future actions that arise as a result of the recommendations in of the main report will be considered by the Council's Cabinet and it will take full regard to the seven national wellbeing goals.

12. CONCLUSION

12.1 This supporting report providing information in the area of 'Corporate Estates Energy and Carbon Reduction' should be considered as part of the main Discussion Paper – Work Programme for the Climate Change Cabinet Steering Group.

RHONDDA CYNON TAF COUNTY BOROUGH COUNCIL CLIMATE CHANGE CABINET STEERING GROUP

18TH NOVEMBER 2019

COMMUNITY USE OF UNDERUSED/VACANT RCT LAND

REPORT OF THE DIRECTOR OF CORPORATE ESTATES IN DISCUSSION WITH THE CABINET'S CLIMATE CHANGE CHAMPION (COUNCILLOR RHYS LEWIS)

Author(s): David Powell, Director of Corporate Estates and Hilary Reid, Head of Operational Property.

1. PURPOSE OF THE REPORT

1.1 The purpose of the report is to introduce a streamlined process to allow Communities to apply for and use underused/vacant Council owned land for the purposes of garden use in support of the Council's Climate Change Strategy.

2. **RECOMMENDATIONS**

It is recommended that the Steering Group:

- 2.1 Note the contents of this report.
- 2.2 Agrees to consult with external parties to consider the contents of the proposed procedure and incorporate feedback/comments where appropriate.
- 2.3 Receive a future report to formally recommend to Cabinet a new procedure to simplify the process for Community use of underused/vacant Council owned land.

3 REASONS FOR RECOMMENDATIONS

3.1 The contents of this supporting paper on 'Corporate Estates Energy and Carbon Reduction' provides key background information for the Discussion Paper – Work Programme for the Climate Change Cabinet Steering Group meeting.

4. BACKGROUND

- 4.1 The Council receives many requests from members of the public to use small parcels of land for various forms of gardening operations. These requests are from both individuals and groups and the land in question is usually small in nature and unused, sitting vacant and often attracting unwelcome uses such as fly-tipping.
- 4.2. Currently these applications are dealt with by the Estate Management team in conjunction with the RCT Together team. The usual process for this would be to provide certain quite in depth information:
 - Expression of interest
 - Business plan based upon circa 6 pages of detailed requirements
 - A fact sheet/guidance of circa 20 pages
- 4.3 This information gathering has been case experience driven and is usually the best way to allow a group to progress successfully toward asset transfer and/or grant funding support.
- 4.4 In some instances, it has been highlighted by applicants that they think the process is too onerous and that the scope of the information required is not appropriate to the scale of the land use request. This is particularly so where the applicant is an individual.

5. PROPOSED STREAMLINED PROCESS

- 5.1 In order to protect the Council's position in terms of (for example):
 - Insurance cover;
 - Regaining possession of the land at a future date;
 - Mis-use/inappropriate use of the land;
 - The land and/or items placed upon it falling into disrepair;

it is important that a formal document is entered into with the third party no matter how small the land parcel but it would be beneficial to create a less detailed, streamlined process for this area of land use.

5.2 Therefore, the procedure currently in place has been reviewed with the above in mind and a simpler application form has been produced to

streamline the scrutiny of the applicant(s) ability to take on the project. A copy of the proposed application form is included as Appendix A.

6. EQUALITY AND DIVERSITY IMPLICATIONS

6.1 An Equality Impact Assessment is not required with regard to this report.

7. CONSULTATION

7.1 Feedback/comments will be taken on board following the presentation of this report to the Climate Change Cabinet Steering Group together with any further consultation deemed necessary prior to introducing the new procedure.

8. FINANCIAL IMPLICATION(S)

8.1 There are no financial implications aligned to this supporting report.

9. **LEGAL IMPLICATIONS**

9.1 There are no legal implications aligned to this report

10. <u>LINKS TO THE CORPORATE AND NATIONAL PRIORITIES AND THE</u> WELL-BEING OF FUTURE GENERATIONS ACT.

10.1 This report provides information to support the main Discussion Paper – Work Programme for the Climate Change Cabinet Steering Group. The future actions that arise as a result of the recommendations of the main report will be considered by the Council's Cabinet and it will take full regard to the seven national wellbeing goals.

11 <u>CONCLUSION</u>

11.1 The proposed new application form will streamline the process for individuals/groups to apply to use underused/vacant Council owned land for Community benefits such as creating gardens, orchards and other beneficial environmental/sustainable uses.

GUIDANCE NOTES TO HELP WITH YOUR APPLICATION

THE FORM:

- give as much detail as you can-include photographs and location maps if possible
- telephone the estates team on 01443 281188 for any assistance
- the form can be filled in and emailed to us or filled in and posted. hand written forms are acceptable
- it is usually helpful for you to keep a copy for your records
- the form will form the starting point for your interaction with the case officer dealing with your application
- the case officer will contact you following receipt of your application and you will have a named contact from there on

THE PROCESS:

- once the form is received it will be reviewed by the case officer having regard to various issues for example: the councils title deeds and council department comments/advice
- a letter will then be sent to you either listing the council's requirements for the use of the area by you to go ahead or explaining that the council cannot proceed in this case
- if you are offered the use of the land, the letter will ask you to confirm that you wish to proceed on that basis
- once your acceptance is received, the council will create a formal agreement for you to sign and you will be able to use the area from that time
- at this point there will be a fee of £60 to cover the council's costs
- if you need help with funding support etc please contact the community development team on 01443 425368 or email RCTTOGETHER@RCTCBC.GOV.UK.
