Life Journey Work

In the reporting period, 100% of life journey material in draft format is made available at the time of panel. An improvement is observed in life journey material available at the point of 2nd Review when compared to previous year. It should also be noted that in instances where life journey material has not been available at the point of 2nd review, further investigation has revealed either the review was bought forward, or adopters have been difficult to engage and have needed prompting to approve the final draft of the life journey book.

Comparative Data April 2020 to September 2023

Referrals

Over the past three years, referrals to the service have remained stable. Nationally, for the same comparative period, other regions have reported a decrease in the number of referrals. When comparing referrals at the mid-year point of the year (April to September), an **18%** decrease is noted and is less than other regions. This trend will need to be monitored for the rest of the year to establish whether this is consistent with national trends.

Should be Adopted

Should be Adopted decisions over the three-year period remain stable. When comparing data at mid-year point, a **9%** increase is observed when compared to 2020-21 and a **26%** decrease is observed when compared to 2021-22.

Placement Orders

VVC observed a slight decline in placement orders in around 2019/2020 but not as significantly as being felt across Wales at present. Our rates of Placement Orders within VVC remain consistent albeit with a larger cohort of these from Cardiff rather than the other local authorities. Cardiff's referral rates remain steady into the adoption service at present. The Vale of Glamorgan noted a decline in care proceedings over the past year although report that recently these have been increasing again. Rhondda Cynon Taff and Merthyr Tydfil both report a change in the way they are working under PLO/pre-birth and that this has been having an impact. Merthyr advise that they have seen a decrease in the rate of children becoming looked after linked to a number of service developments. RCT note the work being undertaken in assessment pre-proceedings including parent and child placements but are mindful that these are situations which inevitably involve risk management and there could be an increase in referrals to adoption if alternative care arrangements are not sustainable.

Children placed

A noted decrease (34%) is noted when compared to the same period in previous year. This is consistent with the decrease in the number of children waiting.

Adoption Orders

An increase in the number of Adoption Orders granted is observed when compared to previous years.

Children matched

A downward trend is noted in the number of children matched, which is consistent when considering the number of children waiting.
