WELSH GOVERNMENT & NHS EXECUTIVE WALES GUIDANCE

There is a requirement for each health board to measure delayed transfers of care activity via a monthly validated constrainers. This will enable monitoring of the number and length of delays, plus their reasons, assisting NHS organ prioritising actions to alleviate delayed transfers of care.

The census is a snapshot process that identifies those people delayed at a given point each month.

The census date is the third Wednesday of each month.

The baseline for future trend analysis and improvement will be from April 23 Census data.

Pathways of Care Delays definition

A pathways of care delay is experienced by an inpatient occupying a bed in an NHS hospital, who is ready to move on t but is prevented from doing so by one or more reasons. <u>The revised definition</u> for recording a delay is:

"any patient post 48 hours clinically optimised"

The "next stage of care" covers all appropriate destinations out of the NHS hospitals.

Notes

1. This definition covers all adults.

Implicit within the definition is the existence of harmonious working arrangements between all agencies involved planning, including efficient, effective and timely communication, which expedite the patient's transfer of care to the or 3. Multi-agency transfer of care processes are complex – many agencies can be involved in the care and discharge place account must be taken of the patient's own wishes and family/carer issues.

4. The purposes of the census, all patients who continue to occupy an NHS in patient bed after their clinically optin must be reported – i.e. locally agreed timescales must not be applied prior to reporting a delay as part of the census
5. The definition covers adults: Clinically Optimised- "A clinical decision has been made by the registered profession ready for transfer or discharge".

6. The registered professional will be part of the Multi-Disciplinary team and have discharge/ transfer rights through the policy and pathways of individual Health Boards and partnership agreements.

7. Discharge does not require an MDT collective decision; it is the lead registered professional who will determine th discharge.

8. The agencies involved in hospital discharge planning will vary from patient to patient.

9. The "next stage of care" covers all discharge destinations out of NHS hospitals .

10. Patients will be excluded from the census who are subject to infection protection and control processes within th previously deemed clinically optimised.

11. When presenting the results in a graph format, a decision may be made to only include decision codes above a convirt within that decision code. For example, codes with 10 or more patients may be shown.

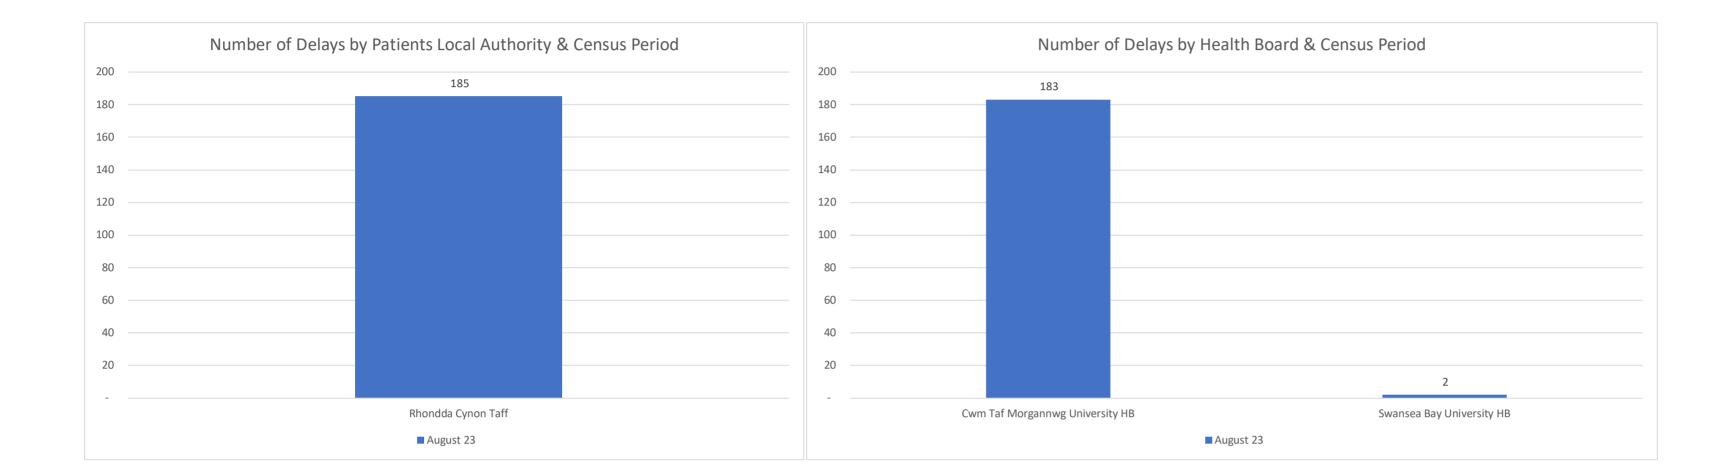

Patient Resident Local Authority & Health Board Where Patient Treatment is Taking Place

* The area included in the information contains All Wales and the specific Regions that contains those Local Authorities. The table below is only connected to the "CensusDate (Month)" slicer. Therefore, to change Census Date please select via the Slicers below.
